

Over 3000 suppliers sign up to Vault

A record number of suppliers are signing up to use Vault, BiP Solution's secure document and e-auction exchange service – with a total of 3109 organisations benefitting from the system.

Vault tenderboxes provide a totally secure means of storing and transmitting Invitation to Tender (ITT) documentation and then receiving and managing responses electronically via the internet.

Vault, which forms part of BiP's Delta e-tendering service, is being used for Pre-Qualification Questionnaires, Invitation to Tenders, Framework - Request for Quotations, Document Exchanges and now the new Competitive Dialogues Tenders which can lead to multiple boxes around the one procurement exercise.

The service helps organisations facilitate all EU procurement procedures - whether open, restricted, negotiated or accelerated - as well as low-value contracts.

Councils can also take advantage of Vault to help meet government targets on efficiency, effectiveness and improved auditability by moving from a paper-based tendering system to the online solution.

Repeat customers to the service include the Glasgow Housing Association and the Scottish Police Services Authority – both of which have signed up to the Delta Bundle package which allows them to use not only Vault but the full range of BiP's e-tendering products: Project, aXcess and Select.

Other satisfied Vault customers include the Healthcare Commission, East Sussex Hospitals NHS Trust, Wycombe District Council and the Northern Constabulary.

To find out more about how BiP Solutions can help your organisation realise greater efficiencies through both Delta-ets and Vault, go to:
